General Information

I have participated in 17 volunteer overseas medical missions, providing anesthesia for repair of cleft lip and palate, genitourinary deformities and burn scar contractures. I have worked in Ecuador, Peru, Nepal, Vietnam, Guatemala and Rwanda.

Statement

While there is no single issue of importance to all anesthesiologists, our chances of success in the struggles with those who seek to define our role and our worth are greatly enhanced when we speak with one voice. Without organized anesthesiology, the individual anesthesiologist has no voice. I believe in the value of organized anesthesiology and want to do my part to make it succeed.
