2018 ANNUAL ANESTHESIA MEETING & WORKSHOPS

COMING TOGETHER:
IMPROVING OUTCOMES
AND DEVELOPING LEADERS

DEAR COLLEAGUES,

On behalf of the California Society of Anesthesiologists (CSA) Educational Programs Division, we are excited to invite you to join us in Palm Springs for the CSA 2018 Annual Anesthesia Meeting & Workshops, to be held March 22-25, 2018.

“COMING TOGETHER: IMPROVING OUTCOMES AND DEVELOPING LEADERS” is the theme that has guided us while developing the program. This year’s program will not only provide the tools needed to deliver high-quality patient care, but will also address how to shape anesthesiology care for the future. The program provides sessions grouped by specialty interest with expert speakers from throughout California and across the nation.

This upcoming 2018 program is shaped by the feedback from members and past CSA meeting attendees. CSA’s mission is to spark innovation and professional collaboration through education. We set out to emphasize the most positive aspects of CSA education—reflection on the ever-growing complexity of our patients, emphasis on interdisciplinary learning and delivering collaborative care with a multidisciplinary scientific approach.

The program starts on Thursday afternoon with three pre-conference workshops that will provide participants with hands-on, small group teaching in the following topics:

• POCUS/TEE/Perioperative Ultrasound
• Advanced Regional Anesthesia
• Women in Leadership

All three workshops are designed to expand scope of practice, as well as foster the exchange of acquired skills amongst professionals in the given area. These workshops are limited in size, so please sign up early if you are interested.

The plenary lectures will be short, high-yield, and organized by specialty interest subjects within a theme reflecting challenges facing anesthesiology in the future. A panel discussion at the end of each module will promote interaction between attendees and speakers. In addition to the wide variety of clinical topics, there are special topics focused on new concepts of enhanced patient management after surgery. These include goal-directed fluid therapy and blood management, opposite sides of evidence based medicine, patient safety, the digital future of perioperative medicine, and legislative challenges in Anesthesia care, all of which will emphasize the anesthesiologist’s role in enhancing the quality of patient care.

Concurrently, the program will host small group Problem-Based Learning Discussions (PBLDs) featuring some of the same expert faculty, but focusing on case-based and practical take-home points.

One of the most exciting highlights of this meeting will be the launch of the first afternoon dedicated to Practice Management sessions.

We have again this year the annual Anesthesia Abstract Presentations in general session. The abstracts will be presented as oral and visual presentations for CME credit. This will be an excellent opportunity to share recent and relatively unknown research with your fellow colleagues and peers!

The 2018 CSA annual meeting is set to be both an excellent educational experience for anesthesiologists, as well as an opportunity to network with peers in our scientific community. We look forward seeing you all in Palm Springs / Palm Desert, California.

Associate Scientific Program Chair
The mission of the Educational Programs Division of the California Society of Anesthesiologists is to provide relevant, timely, high quality education to anesthesia professionals in California and from all over the world. This, in turn, allows the learners to deliver high quality patient care. We deliver this education using a variety of platforms, including didactic lectures, journal articles, Internet courses and hands-on workshops.

VISION: The educational mission of the California Society of Anesthesiologists is to improve competence and performance in the provision of high quality perioperative anesthesia care.

PURPOSE: CSA will provide relevant, timely, high quality live educational activities to physician anesthesiologists and other anesthesia professionals. Educational formats are designed utilizing the principles of effective adult learning in order to best achieve the activity’s educational objectives. Through a strategic partnership with the American Board of Anesthesiology, CSA provides education that fulfills maintenance of certification requirements for our learners. CSA is committed to engage in educational initiatives that support physicians’ continuing professional development.

CONTENT: The scope of educational topics covered by the Society’s CME programs shall be very broad, but all activities must meet the AMA/PRA definition of continuing medical education and be related to the specialty of anesthesiology. These topics could include but are not limited to:

- Basic sciences
- Clinical sciences
- Organ-based basic and clinical sciences
- Clinical subspecialties
- Special problems or issues in anesthesiology

TARGET AUDIENCE: Educational programs are designed to address the continuing medical education needs of physician anesthesiologists and allied health care professionals worldwide who are dedicated to the practice of all aspects of the field of anesthesiology and perioperative medicine.

TYPES OF ACTIVITIES: CSA offers educational activities in a variety of formats including, but not limited to, live and online activities. These activities may include innovative and hands-on learning at workshops, problem-based learning discussions, pro/con debates, as well as other formats.

OUTCOMES /EXPECTED RESULTS: CSA expects that its participants will improve their competence by increasing their knowledge and skill sets, and/or improve their performance by applying their newly acquired knowledge and skill sets in their practice. Our goal is to enhance our participants’ ability to provide quality and safe patient care. It is the belief of the CSA that by improving competence and performance, ultimately patient outcomes will be improved.

STATEMENT OF EDUCATIONAL NEED:
Anesthesiology is a dynamic specialty with significant changes expected on a number of fronts in the years to come, including new clinical technologies and practices, regulatory changes, business process changes, and overall changes in the healthcare environment. In addition to covering the latest clinical information, this program seeks to prepare participants for emerging and anticipated changes in the practice of anesthesiology.

COMMERCIAL SUPPORT ACKNOWLEDGEMENT:
This CME activity may be supported by educational grants. A complete list of supporters will be available online in the course syllabus.

RESOLUTION OF CONFLICTS OF INTERESTS:
In accordance with the ACCME Standards for Commercial Support, the CSA adheres to strict guidelines and procedures to identify and resolve conflicts of interest for all individuals in a position to control content of this CME activity.

ACCREDITATION AND CREDIT DESIGNATION: The California Society of Anesthesiologists is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The California Society of Anesthesiologists designates this live activity for a maximum of 24.5 AMA PRA Category 1 Credits™. Physicians should only claim credits commensurate with the extent of their participation in the activity. Certificates for CME credits will be issued at the conclusion of the meeting, based upon attendance records.

FACULTY DISCLOSURES
The California Society of Anesthesiologists adheres to the ACCME Standards for Commercial Support regarding industry support of continuing medical education. All faculty participating in continuing medical education activities sponsored by the California Society of Anesthesiologists are required to disclose any relevant financial interest or other relationship with the manufacturer(s) of any commercial product(s) discussed in a continuing medical education presentation(s). A complete listing of faculty disclosures will be available online on the meeting’s website.

PROBLEM-BASED LEARNING DISCUSSIONS (PBLDS)
Participants can tailor their educational experience based on individual needs and interests. PBLDs will be limited to 15 participants per group, allowing for close interaction between moderators and peers while exploring specific clinical problems.

Space is limited and availability will be on a first come, first serve basis. General lectures will concurrently be offered, should your PBLD of choice be fully booked.
HOTEL ACCOMMODATIONS:
The CSA 2018 Annual Anesthesia Meeting & Workshops will be held at the JW Marriott Desert Springs Resort & Spa in Palm Springs area of CA.

A lush exotic oasis amid pristine open desert, the JW Marriott Desert Springs Resort & Spa shines like the ever-present sun - with unparalleled beauty and unlimited possibilities - one resort with 100 adventures for your business, leisure and meeting needs.

For reservations, please click the link below: https://aws.passkey.com/e/49182408
Or call Central Reservations at 1-888-538-9459 and refer to ‘CSA Annual Anesthesia Meeting’ when making your reservation.

Group rates are available but limited, so please book early. The room rate is $269 night plus $10 resort fee for single or double occupancy (plus taxes). Reservations must be made on or before February 26, 2018, for the group rate, subject to availability.
These intensive hands-on Workshops are of longer duration and begin with comprehensive lectures on a focused topic presented by our expert faculty. After the introductory lectures, learners have substantial opportunity for hands-on practice using live models and/or cadavers. Attendees are supported by expert clinicians who share their knowledge and experience in this interactive, small group learning environment. These sessions are clinically focused, with practical elements such as machine adjustments to optimize images being covered, as well as ample time for questions and answers.

Separate registration is required and space is limited, please register early.
ASSESS the risk factors associated with management of the pediatric patient during the surgery; develop new clinical approach to pediatric patients to decrease complication rate during anesthesia and postoperatively in the ICU; and apply the current policy on provision of pediatric anesthesia care.

DEMONSTRATE a better understanding of cardio-thoracic pathophysiology and management of acute cardiac anesthesia complications; be familiarized with updated treatment algorithms for valvular complications, thoracic complications and as well as medical device associated complications.

IDENTIFY the skill sets needed for basic and advanced regional anesthesia techniques; understand the different options to improve the care of pain patients in the areas of pharmacology, postoperative pain management, and its associated complications.

CALL FOR ANESTHESIA ABSTRACTS

The accepted abstracts will be presented as oral and visual presentations during the CME educational program. This is an excellent opportunity for recent and relatively unknown research to be shared with fellow peers that will hopefully effectively translate into improved health delivery.

We look forward to your submissions - go to http://csahq.org/continuing-medical-education/events - for more information.
